Mapping and Trading Falling Trend Channels

A step by step method to draw parallel corridors, avoid early reversals, and trade with the slope.

72 hours free on your own MetaTrader 5 account, installed in a few minutes with a video for each step · Try it free for 72 hours

01 What it is and why it matters

- A falling trend channel maps price moving downward inside two parallel boundaries.
- Traders often lose capital trying to guess the bottom of a falling move too early.
- The channel frames the move so you can see where price repeatedly rejects.
- It protects you from buying blindly while sellers control the market direction.

02 How to spot it on the chart

- First locate two clear swing highs where price peaked and rolled over downward.
- Draw a straight line connecting the first peak directly to the second peak.
- Take that exact angle and anchor it to the swing valley between those peaks.
- Look for price to respect the upper boundary as resistance and fall away cleanly.

03 Drawing it in TradingView

- Open your chart and navigate directly to the Trend Line Tools menu on the left.
- Select Parallel Channel from the options to keep both boundaries locked together.
- Click the first swing high, drag to the second high, and click again.
- Pull the cloned lower line down to snap directly onto the lowest swing valley.

04 The common mistake and pro execution

- Amateurs force crooked lines that converge into a wedge and enter without parallel confirmation.
- If boundaries are not strictly parallel, you are trading a trap instead of a corridor.
- Experienced traders follow the downward slope rather than fighting it with speculative buys.
- Wait for a clean break and close above the upper line before considering market turns.

Checklist

- [ ] Identify two distinct swing highs pointing downward
- [ ] Identify the lowest valley between those two peaks
- [ ] Select the Parallel Channel tool from Trend Line Tools
- [ ] Snap the upper line across both swing highs
- [ ] Verify the lower boundary runs strictly parallel through the valley
- [ ] Confirm the trade flows with the corridor slope
- [ ] Stand aside if price breaks cleanly above the upper boundary

Your next step

You can try the Gixodia software free for 72 hours on your own MetaTrader 5 account, and after the trial it is $499/year. You install it yourself in a few minutes with a video for each step. If you have a question first, you can message our team on WhatsApp with one tap.

Try it free for 72 hours | **Chat with our team on WhatsApp**

- Install it yourself in a few minutes, a video for each step
- Runs on your own MetaTrader 5 account, in your name
- No commission, no profit share
- Cancel in one click during the 72 hours

How it works: gixodia.com

https://gixodia.com/en/start

72-hour free trial on the annual license: it starts when you confirm your card, nothing is charged today, and if you cancel during the 72 hours you pay nothing; otherwise the first year, $499, is charged when it ends, renewing yearly at $499 until you cancel. One free trial per person. Lifetime license: $5,780 one time, no trial. Gixodia is software only. Trading involves risk and you can lose money. Not financial advice.
